Subject: NO HERBICIDES IN LANE COUNTY AND BEYOND!

The Lane County Board of Health (Lane County Board of Commissioners) has opened a 60-day public comment period to gather testimony regarding Lane County's Integrated Roadside Vegetation Management Annual Report 2007.

Public comment is sought on two primary questions:

1) Should Lane County Public Works be involved in the business of noxious and invasive plant management?

Yes, only if no herbicides are involved.

2) Should Lane County use limited herbicides as part of its Integrated Roadside Vegetation Management program?

No. Please do not use any chemicals, no matter how limited in use, on our land. These chemicals often stay in the food chain and/or wash away into our waterways. Please, do not use herbicides or chemicals in Lane County Vegetation Management.

Sincerely,
Penelope Petropoulos
