

BEFORE THE BOARD OF COMMISSIONERS OF LANE COUNTY, OREGON

ORDER AND RESOLUTION  
NO: 20-02-04-04

IN THE MATTER OF ESTABLISHING A  
CLIMATE CHANGE STRATEGY FOR LANE  
COUNTY

**WHEREAS**, Lane County recognizes that climate change presents risks and exposes vulnerabilities that threaten long-term human and environmental health, social well-being, and economic vitality of the community; and

**WHEREAS**, the U.S. Global Change Research Program, representing 13 federal agencies and more than 300 federal and non-federal experts, has concluded that the earth is experiencing the “warmest period in the history of modern civilization” and “based on extensive evidence, that it is extremely likely that human activities, especially emissions of greenhouse gases, are the dominant cause of the observed warming” and that without major reductions in emissions, the increase in annual average global temperature relative to preindustrial times could reach 9°F or more by the end of this century (*Fourth National Climate Assessment, Volume 1 (2017)*); and

**WHEREAS**, the physical consequences of climate change are already evident, including rising sea levels; increased hurricane intensity; changes in surface, atmospheric, and oceanic temperatures; melting glaciers; diminishing snow cover; shrinking sea ice; ocean acidification; increasing atmospheric water vapor; increasing heatwave frequency; increasing heavy rainfall intensity and frequency, and increasing tidal flooding; and

**WHEREAS**, rural and marginalized populations in Lane Country and worldwide, are disproportionately affected by the effects of climate change, and that these populations along with young people and future generations will bear the greatest burden of climate change over time without immediate action to reduce greenhouse gas emissions; and

**WHEREAS**, Lane County has been committed to environmental stewardship by employing best practices in providing government services and acknowledges that the magnitude of the challenges posed by global climate change requires new strategies and leadership by government at all levels to take concrete actions;

**NOW, THEREFORE**, the Board of County Commissioners of Lane County **ORDERS and RESOLVES** that Lane County will take action to:

1. Conduct a greenhouse gas emissions inventory and develop an internal plan (Climate Action Plan – Phase 1) for County operations to establish greenhouse gas reduction targets and implementation plans to meet County targets; and
2. Develop a comprehensive countywide plan (Climate Action Plan - Phase 2) with community engagement to outline aggressive goals and strategies, aligned in partnership with city climate actions, to establish countywide community targets and high priority areas of action; and
3. Develop a resiliency plan (Climate Action Plan – Phase 3) to identify adaptation strategies to mitigate the risks and impacts of climate change anticipated for Lane County; and

4. Develop Action Initiatives supporting green jobs, clean energy projects, and climate-friendly industries in Lane County; and
5. Provide open and transparent public communications to monitor and evaluate progress toward climate action goals; and
6. Establish a Climate Advisory Committee to provide recommendations and advise the Board of Commissioners on the County's ongoing climate action work.

Further **RESOLVED**, the Board of County Commissioners acknowledges the attached *Declaration on Human Rights and Climate Change* and endorses the principles contained therein as developed by the Global Network for the Study of Human Rights and the Environment.

**ADOPTED** this 4th day of February, 2020

LANE COUNTY OFFICE OF LEGAL COUNSEL

# DECLARATION ON HUMAN RIGHTS AND CLIMATE CHANGE

## PREAMBLE:

**GUIDED BY** the United Nations Charter; The Universal Declaration of Human Rights; The International Covenant on Economic, Social and Cultural Rights; The International Covenant on Civil and Political Rights; The United Nations Declaration on the Rights of Indigenous Peoples; The Convention on the Elimination of All Forms of Discrimination against Women; The Vienna Declaration and Program of Action of the World Conference of Human Rights; The Universal Declaration on Rights of Children; The Draft United Nations Declaration on the Rights of Peasants; The International Labour Organization Convention No. 169; The 2030 Sustainable Development Goals; The Universal Declaration of the Rights of Mother Earth; The Earth Charter; The Nagoya Protocol; Title II of the 2008 Constitution of Ecuador, and other relevant international rights instruments,

**GUIDED BY** The Stockholm Declaration of the United Nations Conference on the Human Environment; The United Nations Framework Convention on Climate Change, its Kyoto Protocol and the Paris Agreement; The World Charter for Nature; The United Nations Convention on the Law of the Sea; The Rio Declaration on Environment and Development, and other relevant instruments of international environmental law,

**REAFFIRMING** the universality, indivisibility, interdependence and interrelationality of all human rights, the interrelationality of all life on Earth and the dependency of all life on Earth on a healthy biosphere and Earth system integrity,

**RECOGNIZING** that climate change, caused by the human industrial and consumer activities, disproportionately affects indigenous peoples, the poor, women and children, the vulnerable, small island and low elevation coastal communities, developing countries, least developed countries, future generations and innumerable living beings and systems,

**RECOGNIZING** that the ultimate realization of human rights in the age of climate crisis requires the full legal protection of the living beings and systems upon which human life depends,

**RECOGNIZING** that human beings are part of the living Earth system,

**RECOGNIZING** the climate destructive and ecocidal results of assuming human separation from nature,

**RECOGNIZING** the need for all cultures, faiths and traditions to play a role in the fullest development of climate and environmental stewardship, the teaching of respect for all living beings and systems and the development of climate resilient communities,

**RECOGNIZING** that science confirms the threats of climate change to the Earth's systems and its multiple life forms,

**RECOGNIZING** that science confirms the threat of climate change to the livelihoods and well-being of present and future generations,

**RECOGNIZING** that climate impacts disproportionately affect innumerable living beings and systems that are intrinsically valuable in their own right and unable to defend themselves,

**RECOGNIZING** that climate change displaces populations and that international, cross-border and internal migration has increased due to climate change and is likely to continue to do so,

**RECOGNIZING** that courts and jurists of international standing link the fulfillment of human rights to a secure, healthy and ecologically viable environment, and consequently recognize that harming the environment undermines human rights,

**RECOGNIZING** that it is the stewardship responsibility of human beings to respond to the climate harms and damage caused by human activities,

**DEEPLY CONCERNED** by the severe human rights consequences of the continuing political failure to reach adequate commitments on climate mitigation and adaptation; by the dominance of the market as the primary value coordinating international responses to the climate crisis; and by the ongoing lack of accountability for corporate actors that violate human, environmental and climate rights,

**CONVINCED** that the potential irreversibility of climate change effects gives rise to an urgent need for new forms of state and non-state responsibility, accountability and liability.

## THE FOLLOWING PRINCIPLES ARE DECLARED:

### I.

1. Human rights and a profound commitment to climate justice are interdependent and indivisible.
2. All human beings, animals and living systems have the right to a secure, healthy and ecologically sound Earth system.
3. All human beings have the right to fairness, equity and justice in all climate resilience, adaptation and mitigation measures and efforts.
4. All human beings have the right to a planetary climate suitable to meet equitably the ecologically responsible needs of present generations without impairing the rights of future generations to meet equitably their ecologically responsible needs.
5. All human beings, animals and living systems have the right to the highest attainable standard of health, free from environmental pollution, degradation and harmful emissions and to be free from dangerous anthropogenic interference with the climate system such that rising global temperatures are kept well below 2 degrees centigrade above preindustrial levels.
6. All human beings have the right to investments in adaptation and mitigation to prevent the deleterious consequences of anthropogenic climate change, and to international solidarity and timely assistance in the event of climate change driven catastrophes.
7. All human beings, animals and living systems have the right to fairness, equity and justice in respect of responses to the threat of climate change. This includes protection from deleterious impacts caused by adaptation and mitigation efforts to develop climate resilience, and by the potential deployment of climate geoengineering technologies.
8. All human beings have the right to a just transition towards a sustainable society characterized by meaningful inclusion and distributive justice.

### II.

9. All human beings have the right to information about, and to participation in, decision-making processes related to alterations made to the physical environments they rely upon for their health and survival.
10. All human beings have the right to information concerning the climate. The information shall be timely, clear, understandable and available without undue financial burden to the applicant.
11. All human beings have the right to hold and express opinions and to disseminate ideas and information regarding the climate.
12. All human beings have the right to climate and human rights education. This education includes the right to learn from multiple perspectives and to understand non-human natural modes of behavior and the requirements of flourishing planetary ecosystems.
13. All human beings have the right to active, free, and meaningful participation in planning and decision-making activities and processes that may have an impact on the climate. This particularly includes the rights of indigenous peoples, women and other under-represented groups to equality of meaningful participation. This includes the right to a prior assessment of the climate and human rights consequences of proposed actions. This includes the right to equality of hearing and the right for processes to be free of domination by powerful economic actors. This includes the rights of indigenous peoples to participate in the protection of their rights to their lands, territories, natural resources, tenure rights and cultural heritage.
14. All human beings have the right to associate freely and peacefully with others, and to gather peacefully in public spaces, for purposes of protecting the climate or the rights of those affected by climate harm.

### III.

16. All persons, individually and in association with others, have a moral responsibility to avoid and/or to minimize practices known to contribute to climate damage.
17. All States and business enterprises have a duty to protect the climate and to respect the rights set out in this Declaration.
18. All Parties shall, in all climate change related actions, respect, protect, promote, and fulfil the rights of indigenous peoples. Such rights include support to facilitate mitigation measures; rights to collective self-determination and to free, prior and informed consent; to full and equal participation in environmental and political processes; and to respect and protection for indigenous traditional knowledge. This shall include respect and protection for indigenous customary laws, and proper recognition of the role of indigenous peoples in ensuring the integrity and resilience of natural ecosystems.
19. All Parties shall, in all climate change related actions, ensure gender equality and the full and equal participation of women; intergenerational equity; a just transition of the workforce that creates decent work; food sovereignty; and the integrity and resilience of natural ecosystems.
20. All States have a duty to provide assistance and solidarity to climate refugees. States shall respect the rights to assistance and solidarity and create the necessary legal frameworks to assist and support climate refugees in order to ensure their life and dignity.
21. All States shall respect and ensure the right to a secure, healthy and ecologically sound environment and to a stable climate, and ensure the rights outlined in Parts I–III of this Declaration. Accordingly, they shall adopt the administrative, legislative and other measures necessary to effectively implement the rights in this Declaration.
22. All States shall ensure international cooperation with other States and international organizations and agencies for the purpose of respecting the rights outlined in Parts I–III of this Declaration. All States shall observe the rights and duties in this Declaration, including extraterritorially.
23. All international organizations and agencies shall observe the rights and duties in this Declaration, including the human and procedural rights of indigenous peoples, women and other traditionally under-represented and marginalized groups and individuals.
24. All States, international organizations, business enterprises and individuals acting to reduce climate harms shall respect and recognize the rights of any affected human beings and other living beings and systems to be free from climate change-related harm.
