Memorandum Date:

January 25, 2010

Meeting Date: February 9, 2010

TO:

**Board of County Commissioners** 

**DEPARTMENT:** 

**Public Works** 

PRESENTED BY:

Celia Barry, Transportation Planning & Traffic

**AGENDA ITEM TITLE:** 

DISCUSSION/Lane County Project Applications for Surface Transportation

Program-Urban (STP-U) Funds in the Metro Area for FY 2011-2013

#### ı. **MOTION**

No formal action is requested. The Board is being provided an opportunity to provide input on Project Development, Preservation, and Modernization projects for the Metropolitan Policy Committee (MPC) representatives, and staff is asking for approval to submit STP-U funding applications.

#### II. AGENDA ITEM SUMMARY

The Metropolitan Policy Committee (MPC) is scheduled to hold a public hearing in March, and vote on project priorities at their April meeting, for federal STP-U funding, in anticipation of reauthorization of the six-year federal transportation bill. Staff is seeking approval to submit applications for two projects.

The projects County staff is recommending to put forward for MPC consideration are 1) \$880,000 for Overlay of 30th Avenue (I-5 to Spring Boulevard) and 2) contributing \$350,000 to expand the scope of the Beltline Study to include a feasibility study of the Beaver/Hunsaker Street area, and a possible Beaver Street extension. Maps of projects are attached.

#### III. **BACKGROUND/IMPLICATIONS OF ACTION**

#### Α. **Board Action and Other History**

The Board reviewed STP-U priorities last August, when the Central Lane Metropolitan Organization (CLMPO) was about to program Federal Fiscal Year (FFY) 2010. As you know, the six-year federal transportation bill (T-Bill) expired September 30, 2009 and has not yet been renewed. Last August the CLMPO wanted to program the first FFY of the 2010-2013 STP-U fund allocation expected for the CLMPO, in case renewal of the T-Bill occurred. (While the T-Bill has yet to be renewed, the federal government has extended the previous T-bill on an interim basis).

During the 2008-2011 STP-U cycle to date Lane County projects received fund allocations totaling approximately \$963,000, for preservation and safety projects. STP-U funds (and economic stimulus funds) are going toward the Pioneer Pkwy & Harlow/Hayden Br Road Paving project that is a collaborative effort with the City of Springfield. Approximately \$1.2 million in STP-U funds is allocated to a \$1.4 million safety project, Irving Road at Northwest Expressway Railroad Crossing.

More recently, Lane County MPO area traffic signal upgrades were allocated \$196,157 for FFY 2010.

T. 7.Q.

In September 2009 the MPC unanimously voted to approve the following projects for FFY 2010 funding:

Project	Agency	Amount
Arterials & Collectors Slurry Seal	Springfield	\$ 400,000
Traffic Signal Replacements/Upgrades	Lane County	\$ 196,157
Quarry Creek Trail Bridge	Willamalane	\$ 250,000
West Bank Path Extension	Eugene	\$ 800,000
30 <sup>th</sup> Avenue Overlay/I-5 to Springfield	Lane County	
Total		\$1.646,157

The vote included a provision in the motion that should additional STP-U funds become available in FFY 2010, those funds should be directed to the Lane County 30th Avenue Overlay application and the 30th Avenue Overlay application should be prioritized for future FFY 2011 STP-U funding.

The Beaver Street Feasibility Study received attention a number of years ago before loss of Secure Rural Schools Funding. It was in the County's Capital Improvement Program (CIP) and initial public outreach occurred. It was dropped from the CIP project list based upon loss of stable CIP funding. This was prior to commencement of the Beltline/River Road to Coburg Road Refinement Plan Study now underway. The project is now included in the CIP as a "project for development".

## B. <u>Policy Issues</u>

With regard to the 30<sup>th</sup> Avenue overlay project, the County-wide Transportation System Plan (TSP) spells out financial priorities in times of declining revenue. The policies prioritize safety, and preservation to protect the public investment in the county road system. The current economic climate is characterized by declining federal timber replacement receipts. State funding for transportation, enacted as HB 2001, will partially replace federal funds.

*TransPlan* is the adopted TSP for the Eugene-Springfield metropolitan area. *TransPlan* Finance Policy #2 regarding Operations, Maintenance, and Preservation states, "Operate and maintain transportation facilities in a way that reduces the need for more expensive future repair." The 30<sup>th</sup> Avenue Overlay, which would occur in 2013, is consistent with this policy direction.

Also, as noted previously, in September 2009 the MPC unanimously voted to approve the list of projects in the table in Section III.A. above for FFY 2010 funding. In approving the list of projects and excluding funding for 30<sup>th</sup> Avenue, the vote included a provision that should additional STP-U funds become available in FFY 2010, those funds should be directed to the Lane County 30th Avenue Overlay application and the 30th Avenue Overlay application should be prioritized for future FFY 2011 STP-U funding. As such, MPC previously provided direction to prioritize 30<sup>th</sup> Avenue. The Board of Commissioners was consulted and approved of this direction in August 2009.

Regarding the proposed Beaver Street Extension Feasibility Study, The project is listed as 'Beaver Street Arterial/Hunsaker Lane to Wilkes Drive" in the Regional Transportation Plan (RTP) and in *TransPlan*, on the Illustrative project list. It is consistent with the following *TransPlan* policies:

### TSI System-Wide Policies

- #2 Develop or promote intermodal linkages for connectivity and ease of transfer among all transportation modes.
- #4 Support transportation strategies that enhance neighborhood livability.

# TSI Roadway Policies

#1 Address the mobility and safety needs of motorists, transit users, bicyclists, pedestrians, and the needs of emergency vehicles when planning and constructing roadway system improvements.

## TSI Pedestrian Policies

- #1 Provide for a pedestrian environment that is well integrated with adjacent land uses and is designed to enhance the safety, comfort, and convenience of walking.
- #3 Construct sidewalks along urban area arterial and collector roadways, except freeways.

# TSI Goods Movement Policies

#1 Support reasonable and reliable travel times for freight/goods movement in the Eugene-Springfield region.

## Finance Policies

#3 Set priorities for investment of Oregon Department of Transportation (ODOT) and federal revenues programmed in the region's Transportation Improvement Program (TIP) to address safety and major capacity problems on the region's transportation system.

Many kinds of projects are eligible for STP-U funding. Attached is an abstract of U.S. Code, Title 23, that lists eligible activities.

## C. Board Goals

Two goals from the Strategic Plan, page 13, are relevant:

- Contribute to appropriate community development in the areas of transportation and telecommunications infrastructure, housing, growth management, and land development.
- Protect the public's assets by maintaining, replacing or upgrading the County's investments in systems and capital infrastructure.

## D. Financial and/or Resource Considerations

Please also see Policy Issues, above. While substantial reductions in the CIP have been made in recent years, and preservation has become the focus of the program, new state revenue has recently become available, and other considerations are emerging that suggest transportation improvements other than preservation work be given some priority. In particular climate change is forcing federal, state, and local agencies to find ways to reduce carbon emissions. Preservation work must always be a priority, and other improvements that enhance alternative transportation modes and reduce congestion must also be considered.

A %10.27 match is required for STP-U funding and this generally comes from the County Road Fund.

## E. Analysis

Please see the discussions under Policy Issues and Financial and Resource Considerations, above. The projects are consistent with adopted transportation and Road Fund financial policy priorities in the TSP.

MPC will be looking at rating criteria in February that will prioritize the projects submitted by each jurisdiction relative to each other. The attached project sheets provide Project Selection Factors endorsed previously at the County Board level, for county CIP projects.

The Board and MPC previously provided direction to prioritize the 30<sup>th</sup> Avenue project, in August 2009 and in September 2009, respectively.

As mentioned above in Background, the Beaver Street feasibility project was investigated a number of years ago, in 1996 prior to commencement of the Beltline Study. If resurrected, it would expand the scope of the Beltline Study to investigate ways to promote bicycle and pedestrian connectivity and reduce congestion in the River Road area north of Beltline.

Those of you who use the Beltline Highway may be familiar with the Beaver/Hunsaker Street connection between Division Avenue and River Road. A high percentage of northbound River Road traffic takes the Division Avenue exit from westbound Beltline. During the afternoon peak hour queuing already occurs on Hunsaker, at the traffic signal on River Road. A large planned unit development (pud) was recently approved at the old Santa Clara elementary school site on the corner of Hunsaker and River Road. The staff review of the traffic impact analysis for this development indicates that the intersection is already approaching capacity although the pud has yet to be built.

Both Hunsaker and Beaver Street are substandard with no bicycle or pedestrian facilities. The existing houses are close to the existing street so acquisition of right-of-way to widen Hunsaker would be highly controversial. In contrast, extending Beaver Street to Wilkes Drive could possibly occur on largely undeveloped land. Wilkes Drive already has adequate right-of-way and some bicycle and pedestrian facilities. Extension of Beaver Street to Wilkes Avenue would be studied as to at least two different alternative routes. Widening Hunsaker, possibly to a substandard width, would be another possible alternative; however the intersection is approaching failure at this time, so this would not address traffic congestion issues.

When public outreach occurred in the past, comments included that the project would be better done as part of a larger scope looking at the system as a whole. Currently the Beltline Study is occurring and the timing is excellent to expand its scope to include Beaver/Hunsaker. ODOT has directed the consultant to do an initial scope analysis of whether doing so would be of benefit to the Beltline facility.

## F. Alternatives/Options

Staff requests approval to submit applications as discussed above. The Board may also decide to provide comment to County MPC representatives. The Board could decide to support or not support one or both applications, or consider other county roads or projects provided they are consistent with the adopted Regional Transportation Plan (RTP). STP guidelines on eligible projects are attached.

Attached is the computerized list of county roads of 2009-2013 Overlays by Zone and Proposed Treatment year. Recognize that this list is a preliminary, computer generated list that does not account for road usage, field inspections, and interim treatments that County may have made.

Also attached is the County's draft preservation list for 2011.

# IV. TIMING/IMPLEMENTATION

MPC will be asked to hold a public hearing in March, and be asked to take action on April 8.

# V. <u>RECOMMENDATION</u>

Approve submittal of applications. No formal action is requested.

# VI. FOLLOW-UP

Not applicable.

# VII. ATTACHMENTS

- 1. Project Information Sheets
- 2. U.S. Code Title 23, Chapter 1, Section 133 Surface Transportation Program
- 3. 2009-2013 Overlays by Zone and Proposed Treatment year
- 4. County Overlay 2011 Draft List

# 30th Ave Overlay Project I-5 to Spring Blvd Estimated Road Fund Cost \$91,000

# Project Scope: Overlay roadway section with a 3" thick Asphalt Concrete

**Project Limit Functional Class**  MP 0 to 2.01 Minor Arterial Road Name **Project Status**  30<sup>th</sup> Ave **Proposed**

**Existing Roadway Condition** 

20,000 ADT **Pavement Type** Asphalt Concrete **PCI** 

53 78 feet Crash Rate Sidewalk

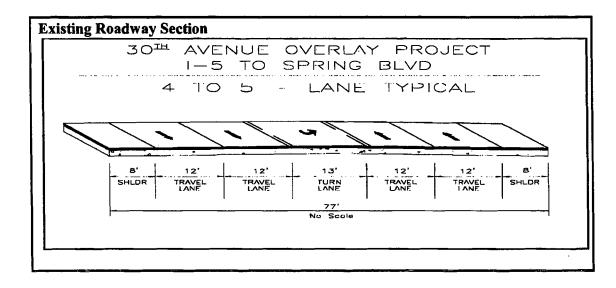

0.1 crash/ mil veh

Curb Bike Lane/Shoulder

## **Define the Problem**

An annual pavement inspection identified signs of pavement distress. The latest PCI reading has dropped below 60, indicating that a preservation project is due soon. If not addressed soon, the rating may slip below 40 at which point the roadway will have to be reconstructed. To avoid such a costly treatment, an overlay project should be programmed in the near future.

# 30th Ave Overlay Project I-5 to Spring Blvd Estimated Road Fund Cost \$91,000

### **Proposed Solution**

Considering the high traffic volume the roadway serves, an overlay of 3" Asphalt Concrete is proposed. The AC thickness will be reviewed when a site survey and design is available. An adequately designed AC overlay project typically adds 10 years of pavement life. Proposed preservation work would also add durable thermoplastic striping, which enhances roadway safety. Staff is seeking an external funding source for this project.

Project Cost (\$.000s)

Leverages Other Projects/Funds		Total Factor Considered	NA

Project Selection factors are shown for informational purposes only. Pavement Preservation projects are typically not ranked with other type of CIP projects. The Pavement Management Program prioritizes candidate roadway list, type of treatment, and time when the treatment should be provided.

Staff is seeking external funding for this project. One potential funding source is the federal Surface Transportation Program for the Metro area (STP-U). This CIP assumes that the project will be considered for STP-U funds in the ODOT STIP cycle 2011-13. The road fund amount shown is local match needed for STP-U fund. Additional funding source may be needed to supplement STP-U funds.

## **Define the Problem**

Congestion on Beltline Highway and River Road are a problem for the Metro area. A high volume of traffic commutes between River Road and I-5 using Beltline Highway. ODOT is currently developing a facility plan to address congestion on Beltline Hwy. Several alternative developed by the study envision connecting to Beaver Street. Beaver

**Roadway Elements** 

# Beaver St Extension Feasibility Study Division Ave to Wilkes Dr Estimated Road Fund Cost \$37,500

Street is a substandard road, which will not be able to handle future added traffic.

## **Proposed Solution**

A separate facility plan is required to coordinate any Beltline Study recommendation regarding Beaver, Street. Incorporate the City of Eugene planned projects' connection with Beaver Street, potentially extending Beaver Street to Wilkes Drive. Include remedy for River Road congestion by providing a bypass.

## Footnotes+

There is multi agency interest in the project. Staff is seeking Surface Transportation Program for the Metro area funds (STP-U) for the study.

The Beaver Street -Hunsaker Ln project was previously adopted in the County CIP and was later dropped due to funding shortages. In light of the new Beltline Highway studies, it is beneficial to prepare a facility plan that coordinate multi-agency improvement efforts in the area.

Total construction cost is undetermined at this time. The facility plan will determine the scope of a potential future project.

TITLE 23 > CHAPTER 1 > § 133

## § 133. Surface transportation program

(a) Establishment.— The Secretary shall establish a

surface transportation program in accordance with this section.

- **(b) Eligible Projects.** A State may obligate funds apportioned to it under section 104 (b)(3) for the surface transportation program only for the following:
  - (1) Construction, reconstruction, rehabilitation, resurfacing, restoration, and operational improvements for highways (including Interstate highways) and bridges (including bridges on public roads of all functional classifications), including any such construction or reconstruction necessary to accommodate other transportation modes, and including the seismic retrofit and painting of and application of calcium magnesium acetate, sodium acetate/formate, or other environmentally acceptable, minimally corrosive anti-icing and de-icing compositions on bridges and approaches thereto and other elevated structures, mitigation of damage to wildlife, habitat, and ecosystems caused by a transportation project funded under this title.
  - (2) Capital costs for transit projects eligible for assistance under chapter 53 of title 49, including vehicles and facilities, whether publicly or privately owned, that are used to provide intercity passenger service by bus.
  - (3) Carpool projects, fringe and corridor parking facilities and programs, bicycle transportation and pedestrian walkways in accordance with section 217, and the modification of public sidewalks to comply with the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.).
  - (4) Highway and transit safety infrastructure improvements and programs, hazard eliminations, projects to mitigate hazards caused by wildlife, and rallway-highway grade crossings.
  - (5) Highway and transit research and development and technology transfer programs.
  - (6) Capital and operating costs for traffic monitoring, management, and control facilities and programs, including advanced truck stop electrification systems.
  - (7) Surface transportation planning programs.
  - (8) Transportation enhancement activities.
  - (9) Transportation control measures listed in section 108 (f)(1)(A) (other than clause (xvi)) of the Clean Air Act (42 U.S.C. 7408 (f)(1)(A)).
  - (10) Development and establishment of management systems under section 303.
  - (11) In accordance with all applicable Federal law and regulations, participation in natural habitat and wetlands mitigation efforts related to projects funded under this title, which may include participation in natural habitat and wetlands mitigation banks; contributions to statewide and regional efforts to conserve, restore, enhance, and create natural habitats and wetlands; and development of statewide and regional natural habitat and wetlands conservation and mitigation plans, including any such banks, efforts, and plans authorized pursuant to the Water Resources Development Act of 1990 (including crediting provisions). Contributions to such mitigation efforts may take place concurrent with or in advance of project construction. Contributions toward these efforts may occur in advance of project construction only if such efforts are consistent with all applicable requirements of Federal law and regulations and State transportation planning processes. With respect to participation in a natural habitat or wetland mitigation effort related to a project funded under this title that has an impact that occurs within the service area of a mitigation bank, preference shall be given, to the maximum extent practicable, to the use of the

Secretary for the permission to do so and the Secretary grants the request.

- (4) Applicability of planning requirements.— Programming and expenditure of funds for projects under this section shall be consistent with the requirements of sections 134 and 135 of this title.
- (5) Applicability of certain requirements to third party sellers.—
  - (A) In general.— Except as provided in subparagraphs (B) and (C), in the case of a transportation enhancement activity funded from the allocation required under paragraph (2), if real property or an interest in real property is to be acquired from a qualified organization exclusively for conservation purposes (as determined under section 170(h) of the Internal Revenue Code of 1986), the organization shall be considered to be the owner of the property for the purpose of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601 et seg.).
  - (B) Federal approval prior to involvement of qualified organization.— If Federal approval of the acquisition of the real property or interest predates the involvement of a qualified organization described in subparagraph (A) in the acquisition of the property, the organization shall be considered to be an acquiring agency or person as described in section 24.101(a)(2) of title 49, Code of Federal Regulations, for the purpose of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.
  - (C) Acquisitions on behalf of recipients of federal funds.— If a qualified organization described in subparagraph (A) has contracted with a State transportation department or other recipient of Federal funds to acquire the real property or interest on behalf of the recipient, the organization shall be considered to be an agent of the recipient for the purpose of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

#### (e) Administration.-

- (1) Noncompliance.— If the Secretary determines that a State or local government has falled to comply substantially with any provision of this section, the Secretary shall notify the State that, if the State falls to take corrective action within 60 days from the date of receipt of the notification, the Secretary will withhold future apportionments under section 104 (b)(3) until the Secretary is satisfied that appropriate corrective action has been taken.
- (2) Program approval.—
  - **(A) Submission of project agreement.—** For each fiscal year, each State shall submit a project agreement that—
    - (i) certifies that the State will meet all the requirements of this section; and
    - (ii) notifies the Secretary of the amount of obligations needed to carry out the program under this section.
  - (B) Request for adjustments of amounts.— Each State shall request from the Secretary such adjustments to the amount of obligations referred to in subparagraph (A)(ii) as the State determines to be necessary.
  - **(C) Effect of approval by the secretary.—** Approval by the Secretary of a project agreement under subparagraph (A) shall be deemed a contractual obligation of the United States to pay surface transportation program funds made available under this title.

### (3) Payments.—

- (A) In general.— Except as provided in subparagraph (B), the Secretary shall make payments to a State of costs incurred by the State for the surface transportation program in accordance with procedures to be established by the Secretary.
- (B) Advance payment option for transportation enhancement activities.-
  - (i) In general.— The Secretary may advance funds to the State for transportation enhancement activities funded from the allocation required by subsection (d)(2) for a fiscal year.
  - (ii) Limitation on amounts.— Amounts advanced under this subparagraph shall

(2) **Joint responsibility.—** Each State, each affected metropolitan planning organization, and the Secretary shall jointly ensure compliance with paragraph (1).
