

Helpful Information from the Surveyor's Office

ENGINEERING AND CONSTRUCTION SERVICES DIVISION - OFFICE OF THE COUNTY SURVEYOR
3050 NORTH DELTA HIGHWAY, EUGENE, OR 97408

The Lane County Surveyor's Office is here to provide service to the public, and to licensed surveyors. The documents you may receive from this office include surveys, maps, plats, or other pertinent data relating to the location, structures and facilities on property owned by you or other citizens. How you choose to use this information may directly affect you, your neighbors, or the public.

Did you know only persons certified by the State and who carry a license to practice surveying can legally define or establish boundaries? We strongly encourage citizens to seek assistance from a Professional Land Surveyor. You can find local surveyors listed on one of the documents provided to you during your visit to this office, in the yellow pages, on the internet, or by visiting the Professional Land Surveyors of Oregon's website at: www.plso.org. Whether you are establishing a fence line, measuring a setback, locating an easement, or performing other activities on your property which requires an understanding of where structures or facilities can be located, a Professional Land Surveyor may be your best resource.

Did you know Oregon requires you "Call Before You Dig" to learn where utilities are located underground? You must call the Oregon Utility Notification Center within 2 business days prior to any excavation/digging. The phone number is 811 or you may find them online at: www.digsafelyoregon.com. Not making this required phone call, can be dangerous to the individual doing the digging, and may also cause damage to your property and to the property of your neighbors.

Our goal is to help you be successful with your task and to provide you the documents filed in the Lane County Surveyor's Office.

Mikeal (Jay) Blommé, PLS
Lane County Surveyor
