

DEQ Mercury Waste Collection Application Form for Conditionally Exempt Hazardous Waste Generators

Please bring this form, including the mercury inventory to the collection event or facility with the mercury or mercury containing waste:

This is a pilot program and disposal is FREE of charge to conditionally exempt generators.

Event Location: _____ **Event Date** _____

1. Generator Information

Generator Name _____ Type of Business _____

Mailing Address _____ Site Address (if different) _____

City _____ State _____ Zip Code _____

_____()_____()_____
Contact Person _____ Telephone Number _____ Fax Number _____

2. Certification for Conditionally Exempt Generators

State and federal hazardous waste regulations limit the use of CEG hazardous waste collection programs to those businesses that generate 100 kilograms (220 pounds or approximately 25 gallons) of hazardous waste per month. Businesses that generate more than this amount must use a licensed hazardous waste hauler to manifest and transport their waste. Therefore, we are requesting that you sign the following certification before disposing of your waste at the collection event:

I certify the business that I am representing is a Conditionally Exempt Hazardous Waste Generator who generates less than 220 pounds of hazardous waste and 2.2 pounds of acutely hazardous waste per month. I also certify that I have not accumulated more than 2,200 pounds of hazardous waste (2.2 pounds of acutely hazardous waste) at this time. I understand that I must pre-register and pay the disposal cost before I can drop off my wastes at the collection event. I also understand that only the types and quantities of wastes listed on the Inventory Sheet(s) in Section 2 have been approved by MSE for disposal at the collection event. Finally, I understand that the state, local government or MSE does not assume liability for my wastes, and that future liability remains with my business.

Authorized Representative (print or type)

Signature of Authorized Representative

3. Mercury Waste Inventory Sheet for Collection Event

(Copy and use additional sheets if necessary.)

Remember you are limited to no more than 2,200 pounds of Conditionally Exempt Generator waste at this event.

Mercury Waste Description	Weight Estimate (Include total weight of mercury containing device or compound)	Number (if thermometers, thermostats, or switches)	For Official Use
Elemental Mercury			
Mercury Thermometers			
Mercury Thermostats			
Mercury Switches (including silent light switches)			
Mercury Containing Compound (such as amalgams, mercurochrome, pesticides, etc.) Specify:			
Sphygmomanometers (Blood Pressure Cuffs)			
Dairy Manometers			
Barometers			
Mercury Containing Batteries			
Other: Specify:			
Total			

Note: For "Other" and "mercury containing waste" describe in as much detail as possible wastes that you want to dispose of at the collection event. The description should include the chemical and trade name, how you use the material, physical state (i.e., liquid, solid, sludge, gas), chemical characteristics (e.g., flammable/ignitable), and chemical constituents and percentages from the label or material safety data sheet (MSDS). **DO NOT** include wastes you do not want to dispose of at the collection event, nor containers of unknown waste substances. Please avoid mixing your wastes together.
